

Carbon Black Dispersions for Conductive/Resistive Applications

Whether you are interested in dissipating an electrostatic charge or trying to prevent one from moving at all, conductive or resistive aqueous carbon black dispersions by Solution Dispersions™ will meet your needs. For graphics, these dispersions are used in low voltage applications for dashboards, non-conventional electrical printing on film, microwave absorption and anti-static applications.

In addition to carbon black dispersions for special applications, we provide dispersions for a wide variety of other industries...so no matter what industry you are in, Solution Dispersions has the right product for you - if we don't have it on the shelf, we can formulate it.

For more information or to obtain a quote, contact us through our office or on the Internet at www.solutiondispersions.com

Carbon Black Dispersions for Conductive/Resistive Applications

PRODUCT CODE	DESCRIPTION	DISPERSANT TYPE
Aquablak® 5909	Conductive	Nonionic
Aquablak® 6843	Conductive	Anionic
Aquablak® 6577	Resistive	Nonionic
Aquablak® 8378	Resistive	Nonionic

Product shelf life: One year when stored properly. Do not allow product to freeze. Do not store product in direct sunlight or heat.
